**DETAILED ACTION**

***Pending Claims***

Claims 1-10, 12, 13, and 15 are pending

***International Search Report***

1. The international search report and written opinion cite JP 2001-102758 as an X-reference. This reference has been considered; however, it does not reasonably teach or suggest the specified silica filler set forth in the instant invention.

***Response to Amendment***

2. The objection to claims 13 and 15 under 37 CFR 1.75 as being substantial duplicates of claims 14 and 16 has been rendered moot by the cancellation of claims 14 and 16.
3. The rejection of claims 1-11 under 35 U.S.C. 101 & 35 U.S.C. 112, 2<sup>nd</sup> paragraph, has been overcome by amendment.

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 13 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The process of claim 1 calls for, among others, the following steps: (a) gluing a prepreg to a metal foil surface; and (b) hot pressing the prepreg and the metal foil surface to produce a laminate board. Claim 13 attempts to further limit this process with, among others, the following steps (a) stacking a prescribed number of sheets of said prepreg and hot-pressing them through laminate molding; and (b) placing a metal foil on one or both sides of the prescribed number of the prepreg sheets stacked for printed wiring board and laminate-molded.

The process steps set forth in claim 13 are inconsistent with the process steps set forth in claim 1. Specifically, claim 1 hot-presses the glued metal foil/prepreg structure; while claim 13 hot-presses a prescribed number of stacked prepreg sheets and merely *places* the metal foil on the prepreg stack. The process steps set forth in claim 13: (1) fail to explicitly hot-press a metal foil/prepreg structure; and (2) improperly broaden the *gluing* step to *placing*. Claim 15 is rejected because it is dependent from claim 13.

***Allowable Subject Matter***

6. Claims 1-10 and 12 are allowed.
7. Claims 13 and 15 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

***Conclusion***

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
